

Department of Commerce

Division of Liquor Control

Your **Liquor Modernization Project (LMP)** liaison is part of a team responsible for helping you prepare to succeed through this phase of the LMP. Their role includes serving as a communication resource. They will provide you with timely and reliable updates about the project and share your questions and input with the project team in Columbus.

Your liaison is working in conjunction with your Auditor. They have already met and discussed Agency visits and upcoming events—including training—which will contribute to your success.

All LMP features will undergo rigorous testing, including a robust User Acceptance Testing (UAT) process. UAT will include the participation of some Agency representatives. Stay tuned for more information.

Please feel free to contact your liaison with questions.
